Leg Day	Use Edit Delete

Routine saved successfully.

ShredTracker | Personal fitness progress

1. Open this page

Add Saved Routines to the navigation on every signed-in screen. Existing MVP controls remain available.

2. Routine actions

Create opens a blank form. Edit opens the same form with saved values. Use opens Log Workout with the routine loaded.

3. Delete confirmation

Show: Delete Upper Body? Buttons: Delete / Cancel. Confirm removes the routine and refreshes this list. Past workouts stay unchanged.

4. Empty state

If there are no routines, replace the list with: No saved routines yet. Create your first routine.

Create Routine

Routine Name

Upper Body

Order	Exercise	Sets	Reps	Weight (lb)	Action
1	Bench press v	3	10	100	Remove

Add Exercise

Bench press: Enter total weight including the bar.

Save Routine | Cancel

ShredTracker | Personal fitness progress

1. Editable fields

Exercise is a dropdown. Order, sets, repetitions and weight are number inputs. Add Exercise adds another editable row.

2. Create and edit states

Create starts with a blank name and one empty exercise row. Edit shows the saved name and rows, with the heading Edit Routine.

3. Validation state

Show an inline message beside invalid fields, such as: Planned sets must be a positive whole number. Keep entered values so the user can correct them.

4. Save or cancel

Save returns to Saved Routines with a success message. Cancel returns without saving. Require at least one exercise.

Save Workout | Cancel

ShredTracker | Personal fitness progress

1. Existing page update

This is the existing Log/Edit Workout screen with a routine selector and Load Routine button. Manual workout entry remains available.

2. Before loading

Load Routine is disabled until a routine is selected. If no routines exist, show No saved routines and a Create Routine link.

3. Protect entered work

If the form already has exercises, confirm before replacing them: Replace current sets? Load / Cancel. Keep date and notes.

4. Plan versus history

Loading a routine does not save a workout. Changing or deleting a routine does not change completed workout history.

ShredTracker | Personal fitness progress

1. Existing page update

This is the existing Log/Edit Workout screen with a routine selector and Load Routine button. Manual workout entry remains available.

2. After loading

Upper Body fills in three bench press sets at 100 lb and 10 reps. Miles can change each set to match what he completed.

3. Save actual results

Save Workout creates the completed workout through the existing endpoint, then opens Workout Details with refreshed comparisons.

4. Plan versus history

Loading a routine does not save a workout. Changing or deleting a routine does not change completed workout history.
